MERN STACK DEVELOPER

Full Stack Developer with hands-on experience building scalable web applications using the **MERN Stack (React.js, Node.js, Express.js, MongoDB)**, **Next.js**, and **Vue.js**. Skilled in engineering secure RESTful APIs, modern backend workflows, and responsive, type-safe frontends with **TypeScript**. Experienced with **AWS Cloud hosting**, **CI/CD automation (GitHub Actions)**, and workflow automation using **n8n**. Driven to solve complex system problems and build robust, high-performance software.

TECHNICAL SKILLS

Languages	: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	: Next.js, React.js, Vue.js (2/3), Tailwind CSS, Bootstrap, Clerk
Backend	: Node.js, Express.js, RESTful APIs, Prisma ORM, n8n (Workflow Automation)
Databases	: MongoDB, Mongoose, SQLite
Cloud & DevOps	: AWS (Cloud Hosting), CI/CD (GitHub Actions), Git, GitHub
Libraries & Tools	: Redux Toolkit, RTK Query, Zustand, React Router, React Hook Form, Zod, Postman, Nodemailer

EXPERIENCE

Software Engineer *Techling*

Jun 2026 – Present
Lahore, Pakistan

- Developed and maintained responsive, high-performance full-stack web applications utilizing **Next.js** and **TypeScript** for optimal performance and SEO.
- Developed clean data models and implemented structured CRUD operations in Next.js applications using **Prisma ORM** and **SQLite**.
- Orchestrated automated backend workflows and third-party service integrations using **n8n** automation tools.
- Deployed scalable services and applications on **AWS Cloud** hosting infrastructure, maintaining high system availability.
- Built robust automated continuous integration and continuous deployment (**CI/CD**) pipelines using **GitHub Actions**.
- Implemented frontend authentication and modern session management flows utilizing the **Clerk** library.

MERN Stack Developer *Venture Tech*

Sep 2025 – Jun 2026
Lahore, Pakistan

- Developed responsive, mobile-first frontend interfaces and reusable components using **React.js**, **Tailwind CSS**, and modern ES6+ JavaScript.
- Engineered scalable and secure RESTful APIs using **Node.js** and **Express.js** with modular architecture, custom middleware, and protected routes.
- Managed application state and optimized frontend data fetching/caching using **Redux Toolkit**, **RTK Query**, and **Zustand**.
- Designed and optimized database schemas in **MongoDB** with Mongoose, enforcing schema validation, indexing, and paginated queries.
- Implemented secure user authentication with password hashing using **JWT (JSON Web Tokens)** and Role-Based Access Control (RBAC).
- Integrated third-party services such as **Nodemailer** for email alerts, **node-cron** for scheduled backend jobs, and managed environments with **dotenv**.
- Created core modules for a Scrap Yard Management System with dynamic features, protected routes, and strict validation via **React Hook Form** and **Zod**.

Trainee Software Engineer (Vue.js) *Developers Studio*

May 2025 – Aug 2025
Lahore, Pakistan

- Developed responsive web applications using **Vue.js (2/3)**, **Bootstrap**, and custom CSS.
- Built reusable components and integrated **RESTful APIs** using asynchronous JavaScript (ES6+).
- Created a **HR Management System (HRMS)** with role-based dashboards and JWT authentication.
- Developed an **E-commerce platform** with product management, cart functionality, and local storage persistence.
- Utilized **Git/GitHub** for version control and team collaboration.

PROJECTS

Sync0 – AI Workflow Platform (Frontend)

React.js, Tailwind CSS, Conversational AI UI

[Live Demo](#)

- Designed and developed a sleek, responsive landing page and interface for **Sync0**, an AI-powered automation platform, utilizing **React.js** and **Tailwind CSS**.
- Built an interactive conversational AI chat input allowing users to issue natural language automation commands with live counter feedbacks.
- Engineered a modular, custom layout grid displaying 150+ tool integrations (Slack, Gmail, GitHub, Jira) with optimized asset rendering and smooth hover animations.
- Structured professional UX components including fully responsive custom headers, footer structures, and interactive, multi-category FAQ accordions.

Armeco Electronics Store Management

MERN Stack, JWT, Admin Controls

[Admin Portal](#)

- Developed a custom full-stack **MERN** application tailored to digitize repair history and customer ledgers for a retail repair store, completely replacing traditional paper registers.
- Implemented an **admin-only portal** with secure authentication, restricting public access and safeguarding customer and repair ledger data according to requirements.
- Engineered robust digital ledger systems to record and track device repair logs, customer profiles, dynamic part pricing, and repair status updates.
- Designed an administrative console with advanced record-searching, historical query filters, and clean data organization to optimize daily shop workflows.

AI-Powered Workflow Automations

n8n, Google Gemini, Groq, Gmail API, Airtable, LangChain

[Workflow Architecture](#)

- Engineered a production-ready automated **Gmail Auto-Responder** in **n8n** that polls incoming mail, classifies intent with a **Groq (Llama)** text classifier, and drafts professional response proposals via **Google Gemini** directly on the thread.
- Built an autonomous **AI Inventory Assistant** utilizing LangChain Agents, window memory buffers, and **Groq** models to query and manage inventories in real-time.
- Integrated service connections with **Airtable** and Gmail OAuth2 to automatically synchronize stock quantities, accessory pricing, and custom notes via chat trigger prompts.
- Leveraged structured JSON schemas and advanced LLM tool-calling configurations in **n8n** to establish zero-maintenance automated business processes.

Scrap Yard Management System

React.js, Redux Toolkit, RTK Query, Tailwind CSS, JWT

[Source Code](#) | [Live Demo](#)

- Engineered a full-stack web application for managing scrap buying and selling operations.
- Implemented **JWT authentication** with **role-based access control** for buyers and sellers.
- Designed dynamic product listings, detailed item views, and a structured blog system.
- Integrated secure form validation with **React Hook Form** and **Zod** and email notifications via EmailJS.
- Built a **responsive, mobile-first UI** with protected routes and optimized frontend performance.

E-commerce Outfit Platform (Frontend Only)

Vue.js, Bootstrap, JavaScript, API Integration

[Source Code](#) | [Live Demo](#)

- Engineered the highly responsive, interactive **frontend user interface** of an e-commerce platform using **Vue.js (2/3)** and **Bootstrap**.
- Integrated frontend views with backend REST APIs to display product listings, maintain a persistent shopping cart, and manage checkout flows.
- Handled reactive page state, routing transitions, and local storage data persistence for enhanced user experience.

EDUCATION

Bachelor of Science in Information Technology

University of the Punjab

2021 – 2025

Lahore, Pakistan

- Final Year Project: **Scrap Yard Management System (MERN Stack)** with role-based access and RESTful APIs.
